ELSEVIER

Journal of Non-Crystalline Solids 192&193 (1995) xiii–xxi

JOURNAL OF NON-CRYSTALLINE SOLIDS

Contents

Preface vii
Opening address: L. Červinka ix
Contents xiii

Introductory lecture

The role of non-crystalline structure in materials science
K. Suzuki 1

Winter-Klein Memorial 1994 lecture

Structure, glass formation and properties
P.H. Gaskell 9

Section 1. X-ray, electron and neutron diffraction

Oral papers

RMC: modelling neutron diffraction, X-ray diffraction and EXAFS data simultaneously for amorphous materials
J.D. Wicks and R.L. McGreevy 23

The dependence of structural peculiarities in binary phosphate glasses on their network modifier content
U. Hoppe, G. Walter, R. Kranold, D. Stachel and A. Barz 28

An X-ray diffraction study of the short-range order around Ni(II), Zn(II) and Cu(II) in pyrophosphate glasses
A. Musinu and G. Piccaluga 32

Posters

Structural investigation of zinc and zinc–europium phosphate glasses by neutron diffraction
M. Bionducci, R. Bellissent, M.P. Medda, G. Piccaluga, G. Pinna and M. Bettinelli. 36

Electron diffraction study of the short-range order in glasses of the system TeO_2–B_2O_3
M.A. Bursukova, E.P. Kashchieva and Y.B. Dimitriev 40

X-ray analysis of the structure of Ge–Bi–S glasses
L. Červinka, J. Bergerová and L. Tichý 45

A neutron diffraction study of a sodium nickel phosphate glass
A. Corrias, P.H. Gaskell, A. Musinu and G. Piccaluga 49

Structural study of complex tellurite glasses
S. Neov, I. Gerasimova, V. Kozhukharov, P. Mikula and P. Lukas 53

Structure determination of Ag–Ge–S glasses by isotopic substitution neutron diffraction
J.H. Lee, A.P. Owens, A. Pradel, A.C. Hannon, M. Ribes and S.R. Elliott 57

High-resolution short-range order study of tellurite glasses
S. Neov, S. Ishmaev and V. Kozhukharov 61

Energy-dispersive X-ray diffraction analysis of the structure of disordered materials
V. Petkov 65

Local arrangement in Ge–Se–I glasses
T. Usuki, O. Uemura, K. Fujimura and Y. Kameda 69

Short-range order in amorphous $(Ge_{1-x}M_x)Se_2$ (M = As, Sb and Bi)
O. Uemura, Y. Nagata, T. Usuki and Y. Kameda 74

Section 2. Medium-range structure

Invited paper

Network topology in aperiodic networks
L.W. Hobbs 79

Oral papers

Vitreous borate networks containing superstructural units: a challenge to the random network theory?
A.C. Wright, N.M. Vedishcheva and B.A. Shakhmatkin 92

Extended-range structural correlations in amorphous solids
A. Uhlherr and S.R. Elliott 98

Short-range and medium-range order in liquid Au–Ge alloys
W. Hoyer and R. Jödicke 102

Stochastic models of local structures versus global atomic configurations
S. Baer, L. Gutman and M. Silbert 106

Twofold description of disordered structures
V. Mayagoitia, F. Rojas and I. Kornhauser 111

Posters

Octahedra's packing in bulk amorphous tungsten oxides
S. Laruelle, M. Figlarz and B. Bouchet-Fabre 116

An X-ray study of phosphate glasses of the composition $[M(PO_3)_2]_n$ (M = Zn, Cu, Mn, Ca and Mg)
L. Červinka, J. Bergerová and M. Trojan 121

The medium-range order in Li and Ag borate glasses (with AgI)
L. Červinka and F. Rocca 125

Nuclear and magnetic medium-range order in a-$Tb_{67}Zr_{33}$ alloy containing hydrogen and its relationship to magnetic behaviour
Q. Chen 129

Simulation evidence for the origin of the first sharp diffraction peak
J.H. Lee and S.R. Elliott 133

Intermediate-range order in base-catalyzed sol–gel silica
R. Popescu, M. Zaharescu, A. Vasilescu, G. Catana and R. Manaila 137

The medium-range structure of amorphous hydrogenated silicon
M.A. Popescu 140

New medium-range order features in Ge–Sb–S glasses
E. Vateva and E. Savova 145

Nano-scale medium-range order in semiconducting glassy chalcogenides
M.V. Baidakova, N.N. Faleev, T.F. Mazets and E.A. Smorgonskaya 149

Medium-range ordering and crystallization of Co–Si–B based alloys with Fe additions
L. Voropaeva, A. Gurov, V. Stelmukh, N. Novokhatskaya and A. Serebryakov 153

Section 3. Spectroscopy (SIMS, XPS, Mössbauer, infrared, Auger, EPR and NMR)

Oral papers

Microstructure and modification in borate and tellurite glasses
J.W. Zwanziger, R.E. Youngman and S.L. Tagg 157

Determination of local structure using X-ray emission spectroscopy: hydrogenated a-SiN_x and a-SiO_x
A. Šimůnek and G. Wiech 161

Posters

Local symmetry and mutual interaction of Mn^{2+} ions in glasses
V. Černý, B. Frumarová-Petrová, J. Rosa, I.L. Licholit and M. Frumar 165

The binding energies of various components in a bismuth-based cuprate superconductor
P. Chakraborty, F. Caccavale, S. Lo Russo and R. Bertoncello 170

Mössbauer spectroscopic investigation of some iron-containing sodium phosphate glasses
G. Concas, F. Congiu, E. Manca, C. Muntoni and G. Pinna 175

Formation and structure of glasses containing SeO_2
Y.B. Dimitriev, S.I. Yordanov and L.I. Lakov 179

Structural changes in vitreous vanadate systems
V. Dimitrov 183

The characterization of the infrared absorption spectra of the vitreous, cubic and monoclinic modification of As_2O_3
D. Ležal and K. Koňák 187

Local structure of glasses in the As_2S_3–Sb_2S_3 system
M.A. El Idrissi Raghni, P.E. Lippens, J. Olivier-Fourcade and J.C. Jumas 191

Preparation and optical properties of silica optical fibres with an Al_2O_3-doped core
V. Matějec, I. Kasik and M. Pospisilová 195

EPR spectroscopy of γ-irradiated 15 $Na_2O \cdot 10(MgO, CaO, TiO_2, ZrO_2) \cdot 75SiO_2$ glasses
M. Mazúr, J. Lesný, P. Pelikán, M. Liška and P. Šimurka 199

EPR and optical absorption spectra of some paramagnetic ions in lithium fluoroborate glasses
B. Sreedhar, Ch. Sumalatha and K. Kojima 203

A study of the mixed-alkali effect in disilicate glasses using ^7Li nuclear magnetic resonance
A.T.-W. Yap and S.R. Elliott 207

Section 4. Dynamics (inelastic neutron scattering, Raman spectroscopy

Invited papers

Propagating and localized phonons in amorphous and quasicrystalline alloys
J. Hafner, M. Krajčí and M. Windisch 212

Ab initio molecular dynamics for liquid metals
G. Kresse 222

Dynamic correlation function studies of the medium-range order in materials
M. Arai, A.C. Hannon, T. Otomo, A. Hiramatsu and T. Nishijima 230

Oral papers

Localized vibrational states in amorphous silicon
A. Chehaidar, M. Djafari Rouhani and A. Zwick 238

Inelastic neutron scattering studies of the structural role of hydrogen in hydrogenated amorphous silicon
R.N. Sinclair, A.C. Wright, T.M. Brunier, A.C. Hannon, S.M. Bennington and F. Jansen 243

The structure of molecular dynamics simulated oxide glasses viewed through Voronoi polyhedra tesselation
M. Liška, P. Perichta and B. Hatalová 249

Light-emitting porous silicon: a structural investigation by high spatial resolution Raman spectroscopy
G. Mariotto, F. Ziglio and F.L. Freire Jr. 253

Posters

Raman study of Bi_2O_3–GeO_2–SiO_2 glasses
P. Beneventi, D. Bersani, P.P. Lottici, L. Kovács, F. Cordioli, A. Montenero and G. Gnappi 258

Void structure in models of vitreous silica
S.N. Taraskin, S.R. Elliott and M.I. Klinger. 263

The structure and dynamics of sodium disilicate glass by molecular dynamics simulation
W. Smith, G.N. Greaves and M.J. Gillan 267

NO_3^- ion dynamics in liquid $0.38Ca(NO_3)_2 \cdot 0.62KNO_3$
T. Kamiyama, K. Shibata, K. Suzuki and Y. Nakamura. 272

Positron annihilation studies of the dynamics of the evolution of free volume in amorphous alloy $Ni_{25}Zr_{55}Al_{20}$
K. Krištiaková, P. Švec, J. Krištiak, O. Šauša and P. Duhaj 277

Partial vibrational spectra for Ni and Nb atoms in the Ni–Nb amorphous system
G.F. Syrykh, M.N. Khlopkin, S.N. Ishmaev and P.I. Soldatov. 282

The structure of amorphous As–X–I (X: S, Se)
K. Saitoh, O. Uemura, T. Usuki and Y. Kameda 286

A thermodynamic, molecular dynamics and neutron diffraction investigation of the distribution of tetrahedral $\{Si^{(n)}\}$ species and the network modifying cation environment in alkali silicate glasses
N.M. Vedishcheva, B.A. Shakhmatkin, M.M. Shultz, B. Vessal, A.C. Wright, B. Bachra, A.G. Clare, A.C. Hannon and R.N. Sinclair 292

Section 5. Liquids and melts

Invited paper

High temperature nuclear magnetic resonance studies of oxide melts
J.F. Stebbins, S. Sen and A.M. George. 298

Posters

The structure of liquid Ga–In alloys
B. Gebhardt, Th. Halm and W. Hoyer 306

The structure of MD simulated cryolite melt
M. Liška, P. Perichta and L.T. Nagy 309

Section 6. Electronic structure

Posters

Electronic distributions and local range order in crystals and quasicrystals
E. Belin, Z. Dankházi, U. Mizutani and A. Sadoc 312

Electronic states of transition metal ions in silicate glasses
Y. Kowada, H. Adachi, M. Tatsumisago and T. Minami 316

Electronic structure of icosahedral Al–Pd–Mn alloys
M. Krajčí, M. Windisch and J. Hafner 321

Section 7. Conductivity

Oral papers

The structure of $AgI–Ag_2MoO_4–Ag_2PO_{3.5}$ glasses studied by ^{31}P magic angle spinning (MAS) NMR and their silver ion conducting properties
N. Machida, A. Ueda, H. Tanaka, T. Shigematsu, N. Nakanishi, M. Takahashi and T. Minami 326

Correlation between the structure of $(1-y)GeS_2 \cdot yAg_2S$ glasses and their ionic conductivity
P. Armand, A. Ibanez, J.M. Tonnerre, D. Raoux, B. Bouchet-Fabre and E. Philippot 330

Poster

On the role of local electric field correlation effects on the ionic interdiffusion in soda-lime glass
A. Quaranta and F. Gonella 334

Section 8. Quasicrystals

Posters

Phonon localization in quasicrystals
M. Krajčí and J. Hafner 338

The problem of atomic density in a six-dimensional model of an icosahedral quasicrystal
M. Mihalkovič and P. Mrafko 343

Section 9. XANES, EXAFS, AXS and XAFS

Oral papers

EXAFS study of the α-AgI phase stabilized at room temperature in a glass matrix
G. Dalba, P. Fornasini, F. Monti, F. Rocca, T. Minami, M. Tatsumisago, N. Torata, M. Adachi and S. Kishimoto 347

XAFS measurements on molten silver halides
M. Inui, S. Takeda, K. Maruyama, Y. Shirakawa and S. Tamaki 351

Posters

An AWAXS study of Co–Er–B ternary amorphous metallic alloys
B. Bouchet-Fabre, A. Kebab, J. Dixmier, H. Lassri and R. Krishnan 355

Anomalous wide angle X-ray scattering study of strontium silicate and aluminosilicate glasses
S. Creux, B. Bouchet-Fabre and P.H. Gaskell. 360

A structural study of glasses in the $As_2S_3–Sb_2S_3–Tl_2S$ system
J.M. Durand, P.E. Lippens, J. Olivier-Fourcade and J.C. Jumas 364

Physical aging in vitreous Ge–Te–Sb calorimetric and X-ray absorption studies
J.M. Saiter, S. Bénazeth, Q. Ma, M. Belhadji and C. Vautier 369

An improved regularization technique for the analysis of anomalous scattering data
R. Serimaa, O. Serimaa and A. Bienenstock 372

Structural analysis of amorphous Zr–Y–Al–Ni alloy by anomalous X-ray scattering
K. Sugiyama, A.H. Shinohara, Y. Waseda and A. Inoue 376

An X-ray absorption study of the Ge–Bi–Se amorphous system
M. Polčík, J. Drahokoupil, I. Drbohlav and L. Tichý 380

Section 10. Relaxation and glass transition

Invited paper

Scattering experiments for the microscopic understanding of the glass transition
E. Bartsch 384

Oral papers

Evolution of order during anomalous glass relaxation
J.C. Phillips 393

Structural relaxation in an equilibrium quasicrystal
M. Dzugutov and J.C. Phillips 397

Structural relaxation and crystallization of amorphous $Ti_{60}Cu_{30}Ni_{10}$ alloy
W.-N. Myung, K.-H. Park, D.-H. Jang, H.-G. Kim, L. Battezzati, K. Aoki and T. Masumoto 401

Relating the atomic structure of alumino-silicate glasses to their ionic transport properties
G.N. Greaves and K.L. Ngai 405

Posters

Anomalous relaxation in a fractal-time random walk model
S. Gomi and F. Yonezawa 411

Analysis of reversible structural relaxation in amorphous alloys with the activation energy spectrum model
O. Haruyama, V. Ocelík and N. Asahi 415

The kinetics of stress-oriented structural relaxation in metallic glasses
V.A. Khonik, A.T. Kosilov and V.A. Mikhailov 420

Reversible relaxation spectra of (Fe–)Ni–P metallic glasses
A. Böhönyey, L.F. Kiss and A. Lovas 424

Anomalous relaxation in amorphous $Fe_{70}Cr_{10.5}P_{11.5}C_{6.5}Mn_{1.5}$
I. Mihalca, I. Zaharie, A. Ercuţa and G. Drăgănescu 428

Structural relaxation and the photoplastic effect in amorphous semiconductors
M.L. Trunov 431

Section 11. Surfaces and thin films

Posters

Nanocrystalline α-Fe_2O_3 sol–gel thin films: a microstructural study
L. Armelao, G. Granozzi, E. Tondello, P. Colombo, G. Principi, P.P. Lottici and G. Antonioli 435

Photoinduced transformations in amorphous GeS_2-based thin films
Z.G. Ivanova and V.S. Vassilev 439

Section 12. Solid state amorphization

Posters

Crystal-to-amorphous phase transformation of the Ga–Sb high-pressure phase
V.E. Antonov, O.I. Barkalov and E.G. Ponyatovsky 443

Optically induced crystal-to-amorphous-state transition in As_2S_3
M. Frumar, A.P. Firth and A.E. Owen 447

Amorphization of Ni and Hf powders by mechanical alloying
O. Haruyama, I. Kanazawa, N. Asahi, M. Ito and T. Iwashita 451

Energy-filtered electron diffraction study of vitreous and amorphized silicas
L.C. Qin and L.W. Hobbs 456

Section 13. Crystallization, aggregation, nucleation and precipitation

Invited paper

Structural and chemical inhomogeneity of single-phase glasses and melts
V.V. Golubkov 463

Oral papers

Diffuse interface approach to crystal nucleation in glasses
L. Gránásy and D.M. Herlach 470

Energetics of microporous materials
A. Navrotsky, I. Petrovic, Y. Hu, C.-y. Chen and M.E. Davis 474

High-temperature structure and crystallization kinetics of Li_2O–TeO_2 glasses
M. Tatsumisago, S.-i. Kato, T. Minami and Y. Kowada 478

Posters

Formation of carbon aggregates in ion-implanted amorphous As–Se
S. Balabanov, T. Tsvetkova, K. Nanev, E. Skordeva, Ts. Marinova, V. Krastev, B. Amov and Ch. Angelov 482

Globular germanium precipitation from supersaturated Al(Ge) solid solutions prepared by thermobaric treatments
O.I. Barkalov, I.T. Belash, A.I. Kolesnikov and Yu.M. Ostanevich 486

Crystallization processes from amorphous $PbTiO_3$ powders prepared by the sol–gel method
D. Bersani, P.P. Lottici, A. Montenero, S. Pigoni and G. Gnappi 490

Effect of tellurium substitution on the crystallization kinetics of amorphous selenium
A. Bhargava, A. Williamson, Y.K. Vijay and I.P. Jain 494

Crystallization behaviour of amorphous $Fe_{74}Cu_1Nb_3Si_{10}B_{12}$
C.F. Conde and A. Conde 498

Nucleation and clustering: a microscopic study of the aggregation behaviour in metastable solutions
L. Gago-Duport, N. de la Rosa-Fox and J.M. García-Ruiz 503

Crystallization process for the metallic glass $Fe_{18}Co_{60}Si_9B_{13}$
E. Jakubczyk, Z. Mandecki and J. Filipecki 509

Influence of temperature time and depth profiles on the pulsed XeCl laser crystallization of evaporated silicon films
E. D'Anna, A. Luches, M. Martino, M. Jergel, S. Luby, E. Majkova and I. Vavra 513

X-ray absorption spectroscopy study of crystallization processes in sol–gel-derived TiO_2
I. Manzini, G. Antonioli, D. Bersani, P.P. Lottici, G. Gnappi and A. Montenero 519

Electronic and thermal processes during the photo-induced crystallization of amorphous $GeSe_2$
O. Matsuda, H. Oe, K. Inoue and K. Murase 524

Crystallization behaviour in the system MgO–Al_2O_3–SiO_2
P. Amista, M. Cesari, A. Montenero, G. Gnappi and L. Lan 529

Aggregation process in silica aerogels on sintering
N. de la Rosa-Fox, L. Gago-Duport and L. Esquivias 534

Section 14. Nanomaterials

Invited paper

Structural evolution and magnetic properties of nano-granular metallic alloys
K. Sumiyama, K. Suzuki, S.A. Makhlouf, K. Wakoh, T. Kamiyama, S. Yamamuro, T.J. Konno, Y.F. Xu, M. Sakurai and T. Hihara 539

Oral papers

Linear and non-linear optical properties of lead nanometer dimension metal particles in silica formed by ion implantation
R.H. Magruder III, R.A. Weeks, S.H. Morgan, Z. Pan, D.O. Henderson and R.A. Zuhr 546

Formation of nanocrystalline structures in amorphous thin films of germanium
H. Hofmeister and T. Junghanns 550

Peculiarities of the 'crystallization' kinetics of $Fe_{73.5}Cu_1Nb_3Si_{13.5}B_9$ ribbon to the nanostructured phase
E. Illeková, F.-A. Kuhnast, J.-M. Fiorani and C. Naguet 556
Structural characterization of the finemet type alloys
P. Duhaj, I. Maťko, P. Švec and D. Janičkovič 561

Posters

The preparation of nanocrystalline boride powders via a solid state reaction induced by the ball milling of nickel–boron mixtures
A. Corrias, G. Ennas, A. Musinu, G. Paschina and D. Zedda 565
Nanocrystallization of amorphous Co–Si–B alloys with strong compound forming additions
V. Stelmukh, A. Gurov, L. Voropaeva, N. Novokhatskaya and A. Serebryakov 570
The structure of nanocrystalline NiAl powders prepared by high-energy ball-milling
C.N.J. Wagner, E. Yang and M.S. Boldrick 574

Section 15. Metallic glasses

Invited paper

Structure of the metallic glass $Dy_{44}Ni_{56}$ by computer simulation of the experimental pair correlation functions
P. Lamparter and S. Steeb 578

Oral papers

Interatomic volume in atomic models of as-quenched and relaxed amorphous $Pd_{52}Ni_{32}P_{16}$
J. Sietsma and B.J. Thijsse 585
Deformation induced bond orientational order in metallic glasses
T. Egami, W. Dmowski, P. Kosmetatos, M. Boord, T. Tomida, E. Oikawa and A. Inoue 591

Posters

Structural models of the yield stress anisotropy of amorphous alloys ribbons
V.Z. Bengus and V. Ocelík 595
A model of defects in metallic glasses
V.A. Borodin 599
Inhomogeneous flow via dislocations in metallic glasses: a survey of experimental evidence
O.P. Bobrov and V.A. Khonik 603
Hardness and thermal stability of Fe–Cr-metalloid glasses
A. Lovas, L.F. Kiss and F. Sommer 608
Icosahedral order, disclinations and the order parameter in simple metallic glasses
V.M. Manichev 612
An electron energy loss spectroscopy study of $Ni_{60}B_{40}$ alloys prepared by chemical reduction and melt spinning
G. Mountjoy, A. Corrias and P.H. Gaskell 616
Disorder in as-quenched Al–TM ternary icosahedral phases
R. Manaila, R. Nicula, R. Popescu and F. Zavaliche 620

Section 16. Computer simulations (modelling, Monte Carlo modelling)

Posters

Computer simulation of a $Ni_{65}B_{35}$ amorphous alloy using the force algorithm
D.K. Belashchenko, M.I. Mendelev and S.N. Ishmaev 623
The structure of liquid sulphur: a tight binding Monte Carlo simulation
L. Descôtes and C. Bichara 627

Computer generated random network models of ion exchanged glasses
M. Dubiel, R. Schmitz, K. Scheerschmidt and H. Hofmeister 632
Energy-dispersive X-ray diffraction and reverse Monte Carlo study of liquid Hg
V. Petkov and G. Yunchov 636
Reverse Monte Carlo approach to the structure of amorphous semiconductors
L. Pusztai and O. Gereben 640

Section 17. Structural transformation (phase transitions, phase separation)

Invited paper
Characterization of phase separation in amorphous films using modern small-angle scattering methods
M.J. Regan and A. Bienenstock 644

Posters
Pressure-induced structural transformations and phenomena in glasses: variations in soft atomic configurations and negative-U centres
M.I. Klinger and S.N. Taraskin 653
The kinetics of the laser induced structural changes in As_2S_3 amorphous films
M. Bertolotti, F. Michelotti, V. Chumash, P. Cherbari, M. Popescu and S. Zamfira 657
The evaluation of the degree of disorder for vitreous systems
D. Radu and M. Lupescu 661
A topological phase transition in ternary chalcogenide films
E.R. Skordeva and D.D. Arsova 665
Photo- and thermally induced phenomena in amorphous $Ge_{30}Sb_{10}S_{60}$ films
M. Vlček, C. Raptis, T. Wágner, A. Vidourek, M. Frumar, I.P. Kotsalas and D. Papadimitriou 669

Section 18. Gel materials

Poster
Structure of gel materials in the system Ce_2O_3–Al_2O_3–P_2O_5
Y.Y. Ivanova, E.J. Spassova, E.P. Kashchieva, M.A. Bursukova and Y.B. Dimitriev 674

Section 19. Miscellaneous

Oral paper
Structure factor of amorphous germanium by quantitative electron diffraction
J. Ankele, J. Mayer, P. Lamparter and S. Steeb 679

Poster
Software package for radial distribution function calculation
A.S. Krylov and A.V. Vvedenskii 683

Closing address: P.H. Gaskell 689

Author index 691
Subject index 700
